

## NEWS RELEASE

### SATORI AND JOURDAN EXPAND THE PICNIC PHOSPHATE PROPERTY NEAR PORT CARTIER QUEBEC

- *New claims have historic airborne geophysics by INCO*
- *Close proximity to and/or contiguous with existing Picnic Phosphate Property*
- *Excellent Infrastructure – new claims are closer to the highway and Port Cartier*

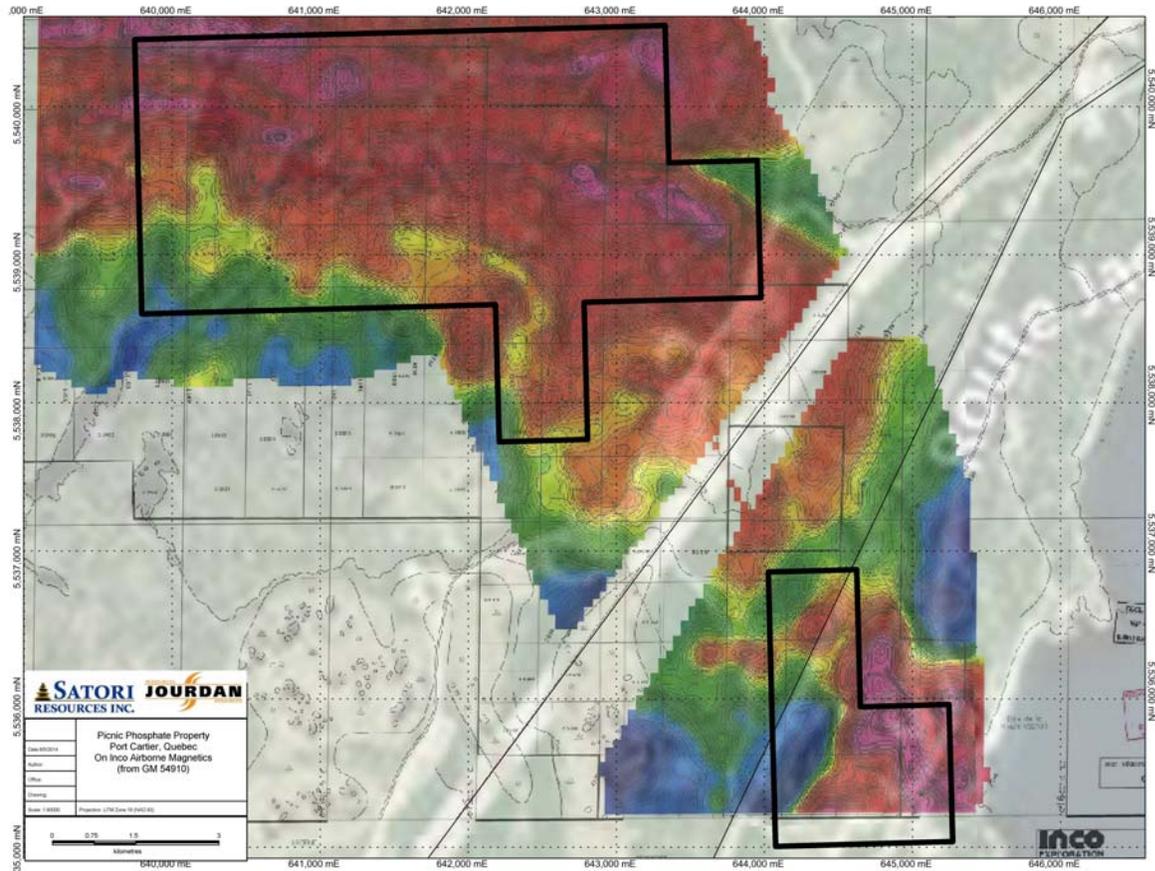

Toronto (Canada), May 7, 2014: JOURDAN RESOURCES INC. (TSX-V: JOR) (“JOURDAN”) ([www.jourdan.ca](http://www.jourdan.ca)) and SATORI RESOURCES INC. (TSX-V: BUD) (“SATORI”) ([www.satoriresources.ca](http://www.satoriresources.ca)); (together with Jourdan and Satori, the (“Parties”)) are pleased to announce that they have staked seven additional claims, increasing the size of the strategic Picnic Phosphate Property (see Map 1). The additional claims appear to have the same magnetic signature as seen on the original block of claims where historic phosphate and/or nickel-copper mineralization occurs (see Map 2). This mineralization appears to be found proximal to the magnetic highs. This staking brings the total number of claims at Picnic to 28, and increases the property size to 15.44 sq. km

**Map 1:** Satori-Jourdan Picnic Phosphate Property, Quebec

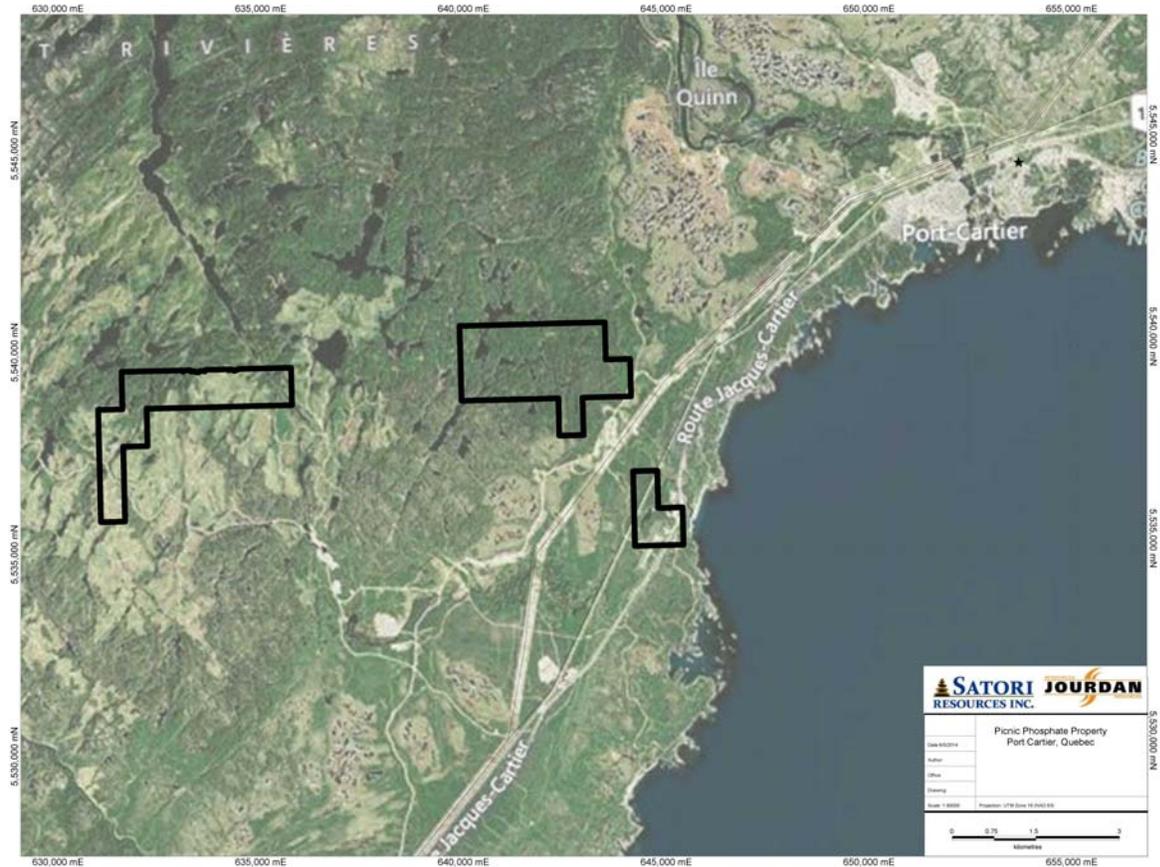

<http://goo.gl/wyla9s>

The geological and geochemical characteristics of the Riviere Pente-Cote Anorthosite (RPA) Complex that hosts the Picnic Phosphate Property appear to be similar to that of the Sept-Iles Anorthosite Complex (SAC), a large, layered, unmetamorphosed, mafic intrusive suite of Cambrian age rocks that hosts the Mine Arnaud Project. The south-east edge of the SAC occurs 20 km east-north-east of the Picnic Phosphate Property. The Mine Arnaud Project covers approximately 3 km of strike length of the SAC. The Picnic Phosphate Property covers approximately 12 km of strike length of the RPA Complex.

**Map 2:** Satori-Jourdan Picnic Phosphate Property, Quebec On Inco Airborne Magnetics  
<http://goo.gl/U07jgl>

The Picnic Phosphate Property now consists of 3 blocks of non-contiguous claims, following historical mineralization or similar magnetic signatures. One of the new blocks of claims ties on to the main highway in the area, and the two eastern most claim blocks have a gap where Hydro Quebec's main power line crosses the high magnetics (see Maps 2 and 3). Additional land was not staked where the companies considered there to be cultural significance, or where third parties already held claims.
